SITUATION SUMMARY

Labor Day Weekend BART Transbay Tube Closure

BART has shut down train service between Oakland and San Francisco over the Labor Day weekend, September 5-7, so workers can rebuild a section of track near the Transbay Tube. Train service stopped at the end of service Friday, September 4, and will remain closed until the start of service on Tuesday morning. BART also wants to remind people since today is a holiday, BART will operate on a Sunday schedule.

- Nearly 100 buses will continuously shuttle passengers between 19th Street BART Station in Oakland and San Francisco's Temporary Transbay Terminal.
- The West Oakland BART Station will be closed during the shutdown. If West Oakland is your home station, there will be a shuttle available to take you to 19th Street/Oakland station.
- Additional information regarding the modified BART schedule can be accessed here:
<https://www.bart.gov/news/articles/2015/news20150803-0>

Weather of Concern

- No significant Weather Watches or Warnings are in effect

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Fair weather will continue across NW California for the next few days. Warmer and drier conditions will prevail each day across the interior through Friday. By Saturday a cooler air mass will begin to affect NW California bringing cooler afternoon temperatures and possibly some clouds.

Medford Weather:

Upper level ridging will build in over the west coast today and remain in control of the region for at least the next week. Meanwhile, a thermal trough will establish just to the south. A weak impulse will pass overhead early Tuesday morning, and may provide just enough energy for an inland marine push that morning, but generally offshore flow and clear skies will remain in place through the week. Temperatures will gradually warm through the week, and although highs today will be generally near normal for this time of year, highs will reach up to 15 degrees above normal by late in the week, and triple digits will not be out of the question Friday for some of the usually warmer locations within the forecast area.

Reno Weather:

High pressure over the desert southwest will lead to very warm and dry conditions. Afternoon highs will approach record levels toward the end of the week. Periods of smoke and haze will be possible through Mono County northward to Highway 50 due to the rough fire.

San Francisco Weather:

Daytime temperatures will continue on a warming trend through at least midweek as high pressure builds over the region. As a result, afternoon temperatures will be about 10 to 15 degrees above seasonal averages while the dry air mass will allow for decent cooling during the overnight hours. Dry weather conditions are also expected through the upcoming weekend.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Widespread triple digit high temperatures will return to the Central Valley beginning Tuesday and continue through the week. The dry air mass and generally light winds will allow for relatively mild overnight lows

Hanford Weather:

Mostly clear skies and increasing temperatures are expected for the next several days as high pressure moves in over the region.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Weak onshore flow and a building ridge of high pressure will bring a warming trend this week. Temperatures will be well above normal for much of the week, with triple digit heat expected for the valleys and other inland areas. Slight cooling is possible by late in the week and the weekend as the ridge of high pressure weakens.

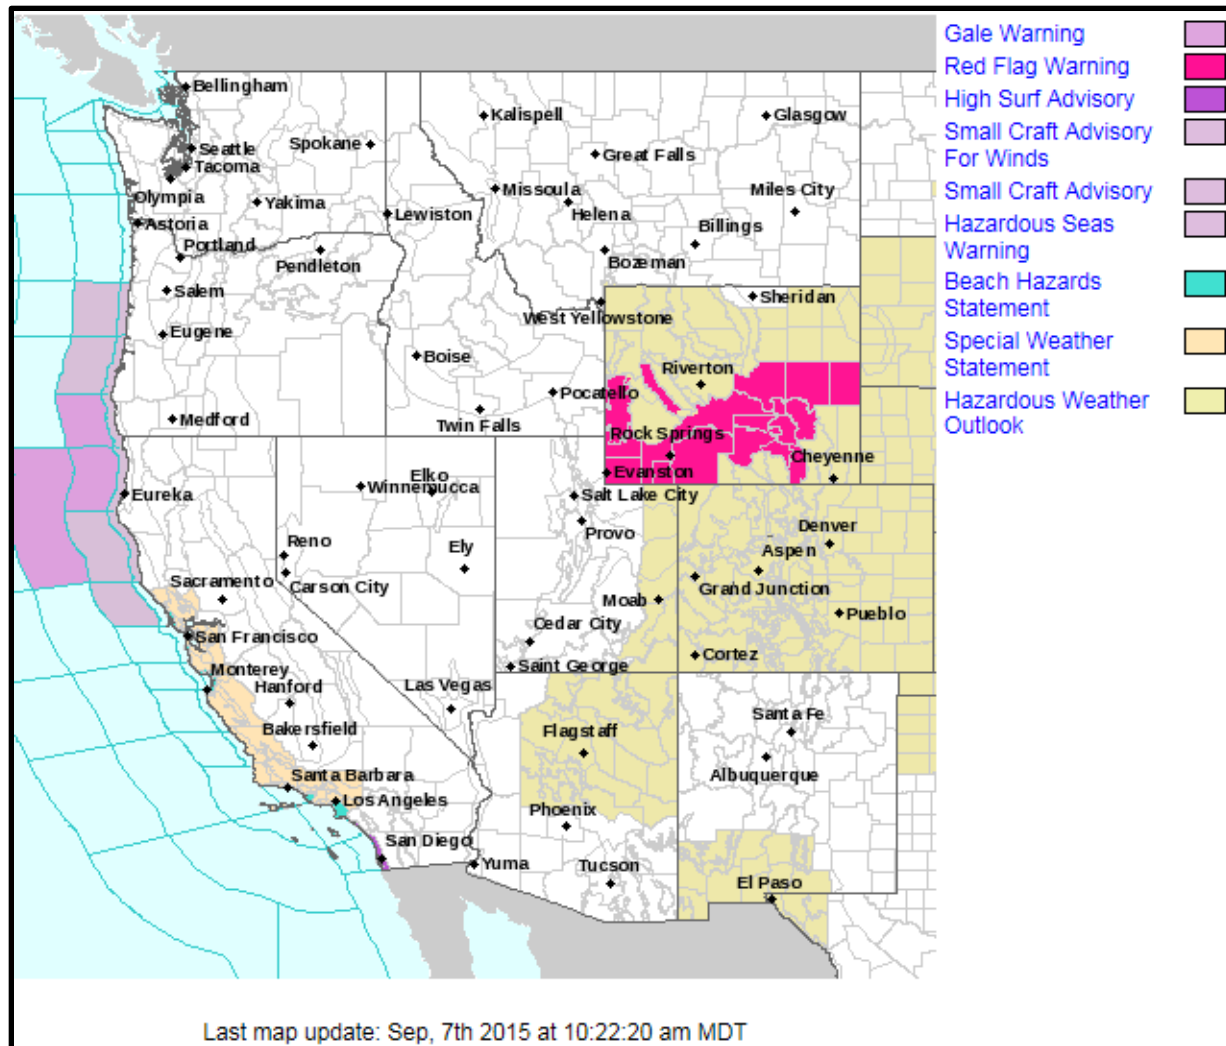

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

High pressure aloft will bring a warming trend this week. Tropical moisture will slowly increase today and Tuesday, with a more significant influx possible on Wednesday and Thursday. This will bring a slight chance of thunderstorms to the mountains and deserts during the afternoon and early evening for today and Tuesday. The chance for afternoon and evening thunderstorms may increase somewhat for the mountains and deserts during the afternoon and early evening for Wednesday and Thursday. High pressure aloft will begin to weaken for late next weekend into early next week with a cooling trend.

Southeast California Weather:

Moisture feeding north into Arizona and the Colorado River Valley may once again touch off a shower or thunderstorm today especially in the afternoon or evening. The chance of a shower or thunderstorm will linger across Mohave County into Tuesday. Another push of moisture from the south may bring a shower or thunderstorm to southern parts of Mohave and San Bernardino Counties on Wednesday and Thursday. Temperatures will return to above normal levels today and remain above normal through the end of the week.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every Monday at 1100 hours.
